

WEBINAR

Multifunctional Reflow Inline Soldering – 3 in 1 solution with and without vacuum

November 26, 2020 at 9.00 a.m.

November 26, 2020 at 3.00 p.m.

Rehm Thermal Systems is the only manufacturer worldwide to offer convection soldering systems and vapour phase soldering systems from one source. The Vision and Condenso series from Rehm have stood for highest quality and process stability for many years. With the newly developed Vision TripleX it has been possible to combine the advantages of both soldering processes in one system.

In the webinar the convection and vapour phase soldering process will be looked at in more detail and the advantages of combining both processes will be highlighted. The new Rehm Vision TripleX impresses above all by its flexibility in using the different processes (convection soldering, convection soldering with vacuum, vapour phase soldering with vacuum) in production.

In the live demo integrated in the webinar the soldering of a complex product on the Rehm Vision TripleX is shown live.

November 26, 2020 at 9:00 a.m. CEST (for Asia, Europe, ROW)

November 26, 2020 at 3:00 p.m. CEST (for Americas, Europe)

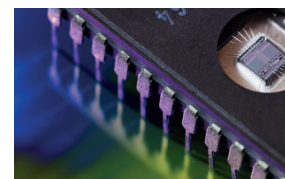

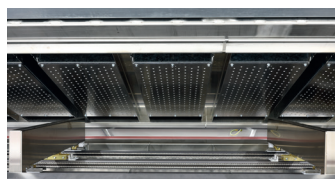

Registration: sales@rehm-group.com

Duration of the webinar: 30 min

Main topics of the webinar

- Convection soldering with and without vacuum
- Condensation soldering with and without vacuum
- TripleX - the 3-in-1 solution
- Live demo at the TripleX
- Questions & Answers

Subject to substantive adjustments
