

THERMAL SYSTEMS

Group Trainings 2026

Rehm Academy

Would you like to update your knowledge and exchange ideas in a group?

Then starting in 2026, we have just the right thing for you!

Our group training sessions offer hands-on knowledge transfer focused on each specific system – directly from the experienced trainers of the Rehm Academy. In small groups, we provide in-depth expertise, practical tips, and targeted instructions to ensure safe and efficient system operation. This way, you and your team are perfectly prepared to operate and maintain your equipment at the highest level.

Topics:

Function and Structure of the Respective System

Get a compact overview of the structure and functionality of the system. The training provides a fundamental understanding of all components and how they interact – the ideal basis for safe and efficient operation.

Software Training for System Operators (userA Level)

Learn about the key functions of the system software at userA level. This training enables operators to carry out daily tasks safely and efficiently – practical and easy to understand.

Daily Maintenance and Inspection

Learn how to correctly perform routine checks and maintenance tasks on the system. This ensures system availability and reliably prevents downtime.

Troubleshooting and Error Analysis During Operation

Identify, analyze, and resolve common malfunctions during operation. This training provides practical solution strategies so that small problems don't turn into big ones.
